

Hi All,

Greetings from Prodesign Technologies!!

We are hiring for the position of Angular developer

Experience – 5 to 7 years

Angular Developer

**WORK LOCATION: WOODLAWN, MD; LEESBURG, VA; DALLAS, TX
DEVELOPMENT
FULL-TIME**

The Angular Developer will be part of a collaborative and agile team that supports and builds modern, standards-based responsive web application for mission-critical health IT solutions. This role is part of a team of curious learners that focus on high quality in their work.

Soframs is a Maryland & Virginia-based small business information technology, consulting, and solutions provider specializing in emerging technologies for UX/UI, Mobile Apps, DevOps, Big Data Analytics, Data Science, and Cyber Security. We offer innovative technology implementations and build customer-centric services that are simple, intuitive, scalable, efficient and most importantly usable.

We at Soframs, believe in agile repeatable processes, modern technologies, intuitive user interfaces, simple solutions, user-centric services that work for our clients and their customers. We emphasize clean, high-quality coding, continuous integration & testing, and automated deployments in scalable hosting environments. We believe in “fail fast” and transparency in our work. Soframs is committed to delivering continuous business value to our clients.

Preference will be given to candidates that are able to work out of our Woodlawn, MD or Leesburg, VA locations. This role can also be remote for the right candidate.

The ideal candidate will possess all of the skills below:

- Ideal candidate is an Angular developer with hands-on experience building modern web front end and single page applications.
- Ideal candidate will have excellent hands-on experience with modular and component based Angular 4 applications
- The ideal candidate will have a solid understanding of front-end design, prototyping and converting wireframes to responsive web interfaces.
- The ideal candidate will have hands-on experience using REST based APIs from Angular components and services.

- The ideal candidate believes and well conversant with various automated testing tools to validate the application and build tools.

We are specifically looking for:

- Someone who is a great team player and genuinely believes in solving challenges as a team
- Someone who believes in exploring alternatives and quickly build prototyping to validate ideas and help iterate concepts
- Someone who understands and believes in the core tenets of agile both in letter and spirit
- Someone with 3 or more years of experience working with Postgres, MySQL or MongoDB.
- Someone with 3 or more years of solid hands-on experience building Angular front-end and single page applications.
- Someone with 3 or more years of hands-on experience in using modern build tool chains and package managers (webpack, gulp, grunt, npm etc.)
- Someone with 3 or more years of experience with developing modular, test first Angular applications.
- Someone with experience testing tools and frameworks like Jasmine, Protractor or similar.
- Someone with experience developing modern responsive web applications with HTML5, CSS3, Bootstrap, LESS, SASS, etc.
- Someone with 3 or more years of experience working in agile environments with tools like Jira, Git, and Confluence.
- Candidates with proven certifications and socially accessible profiles that demonstrate the body of work and participation in modern collaboration hubs.

Preferred qualifications include:

- Ideal candidate should demonstrate proficiency with Angular eco-system
- Ideal candidate should demonstrate proficiency with automated test tools
- Ideal candidate should demonstrate proficiency with modular Angular applications
- While we allow remote video conference during the initial screening process, we do REQUIRE face to face meeting before final confirmation
