

Hi All,

Greetings from Prodesign Technologies!!

We are hiring for the position of Devops Engineer

Experience – 5 to 7 years

## DevOps Engineer

WOODLAWN, MD  
DEVOPS  
FULL-TIME

Softrams LLC is seeking a DevOps Engineer who will be part of a collaborative and agile team that supports and delivers virtual infrastructure for mission-critical health IT solutions.

Softrams is a Maryland & Virginia-based small business information technology, consulting, and solutions provider specializing in emerging technologies for UX/UI, Mobile Apps, DevOps, Big Data Analytics, Data Science, and Cyber Security. We offer innovative technology implementations and build customer-centric services that are simple, intuitive, scalable, efficient and most importantly usable.

We at Softrams, believe in agile repeatable processes, modern technologies, intuitive user interfaces, simple solutions, user-centric services that work for our clients and their customers. We emphasize clean, high-quality coding, continuous integration & testing, and automated deployments in scalable hosting environments. We believe in “fail fast” and transparency in our work. Softrams is committed to delivering continuous business value to our clients.

### **The ideal candidate will possess the skills below:**

- The ideal candidate is passionate about the concept of infrastructure as code and leverages modern tools to define, build and manage virtual infrastructure in the cloud.
- The ideal candidate will have excellent hands-on experience with AWS.
- The ideal candidate will have a solid understanding of Linux systems (Redhat/CentOS), hosts, networks, security, applications and proficiency in shell scripting.
- The ideal candidate will also have solid understanding and experience with configuration management tools like Ansible, or Chef.
- Ideal candidate will hate to do anything twice and believes in automation for consistent, scalable and fool-proof delivery of infrastructure and applications

### **Required qualifications:**

- Someone who is a great team player and genuinely believes in solving challenges as a team.
- Someone who can pick up new technologies and methodologies quickly.
- Someone who believes in exploring alternatives and quickly prototyping to validate hypothetical architectures or solutions
- Someone who understands and believes in the core tenets of agile both in letter and spirit
- Someone with 3 or more years of experience in working as devOps Engineer focusing on CI/CD and CM tools and modern frameworks in the eco-system.
- Someone with 3 or more years of solid hands-on experience with working on AWS
- Someone with 3 or more years of hands-on experience in using Ansible, or Chef.
- Someone with 3 or more years of experience with orchestration tools such as terraform.
- Someone with experience with tools such as Jenkins/Bamboo/Teamcity to enable CI/CD.
- Someone with 3 or more years of experience working with agile tools like Jira, Git, and Confluence.
- Candidates with proven certifications and socially accessible profiles that demonstrate the body of work and participation in modern collaboration hubs.

### **Preferred qualifications:**

- Please provide any code in Github or such that you have worked on personally or in the open source community.
- Be able to demonstrate proficiency with configuration management tools such as Ansible, or Chef, during the interview process.
- Should have a AWS certification or be ready to obtain a certification.

**While we allow remote video conference during the initial screening process, we do REQUIRE face to face meeting before final confirmation.**
