9. Someone who can join immediately/30 days max.
10. Location constraint was been exempted for now.

**Skillset :**

**Senior DevOps Engineer**

We're here to develop the best corporate banking software in the world.

We grow fast in size and knowledge in an industry that is highly innovative and undergoing significant change, doing things no one else has done before.

We are looking for the person that has a getting done mentality, is eager to learn from the best people in the industry, wants to get his hands dirty and enjoys working outside his/her comfort zone in an environment that undergoing change all the time.

If that sounds exciting and you are that person, then we want to hear from you!

**The Role**

**Develop** - with and for software engineers.

**Guard** - you breath 12 factor app principles.

**Release** - quality and control are you middle names.

**Deploy** - as frequent as humanly possible.

**Automate** - everything you do.

**Infrastructure** - expressed through code.

**Deliver** - with every NFR covered.

**Troubleshoot** - before anyone has noticed the glitch.

From repository management to pipelines to deployment and monitoring, you are responsible for guiding, supporting and implementing all that is needed to get our microservice based Contextual Banking eXperience platform deployed and ready to be delivered to banks worldwide.

### **Main requirements**

6+ years of experience with:

Git tools and branching strategies

Maven/Gradle, NPM, JUnit, scripting (shell)

Code quality tools (Codacy/Sonar)

CI tools (Concourse/Bitbucket Pipelines/Jenkins)

Virtualization & container concepts (Docker)

Automation (Ansible/Vagrant/Puppet/Chef)

IaaS (AWS/OpenStack/VMWare ESX/Google Cloud)

Monitoring (AppDynamics/New Relic)

### **Nice to have**

Experience with:

Cloud concepts for development (12 factor app)

PaaS (OpenShift/Cloud Foundry)

Container orchestration (Kubernetes)

OSS policy management (BlackDuck)

Automated testing (Selenium)
